METABOLISM + WEIGHT LOSS

Down a Waist Size in just Two Weeks

"I have tried everything to lose the extra fat around my midsection. I work out regularly, but it wouldn't budge. I finally found the answer to my problem with INSPIRED. I added it to my normal routine. Right away I felt it working, I had more energy and I noticed I wasn't as hungry after my workouts. The best part, after just a couple weeks, I went down a waist size. Needless to say, I'll be using this for life!"

John M., Florida

Your **Basal Metabolic Rate** slows down over time. Some experts suggest it decreases at 1-2 percent per decade starting at age 20, and jumping up to 10 percent per decade once you reach the age of 45. However, research shows you can improve your Metabolism with certain Antioxidant-rich Superfoods. **INSPIRED** is jam-packed with the ones known to restore Metabolic functions such as fat burning and weight loss!

GOJI BERRY

Considered a Superfood, Goji Berry is an Antioxidant powerhouse, not to mention it contains 18 Amino Acids and 21 Trace Minerals. It's known for its low glycemic, metabolism and energy boosting benefits.

MATCHA GREEN TEA

Green Tea contains EGCG a powerful Polyphenol. Research indicates it may help the body balance metabolic function and improve fat burning.

COFFEE FRUIT EXTRACT

Coffee fruit extract contains several compounds that make it ideal for weight loss like Magnesium and Potassium, which has been shown to help the body use insulin, regulate blood sugar levels and reduce cravings. It also contains a natural water soluble (non-synthetic) source of caffeine, which increases energy without the jitters and accompanying fat loss.

GARCINIA CAMBOGIA

An effective weight loss ingredient, Garcinia Cambogia contains hydroxycitric acid (HCA). Studies indicate HCA hinders an enzyme known as citrate lyase, which encourages your body to store fat. It has also been shown to help suppress appetite.

MANGOSTEEN

Another Superfood and Antioxidant, Mangosteen has been shown to assist in weight loss by restricting pancreatic lipase and α -amylase activities, which lead to weight gain.

BLACK CURRANT

This tiny purple berry has the highest Antioxidant content of any fruit, and it contains powerful Anthocyanins (flavonoids) B vitamins, and Thiamine which research shows keeps your body from gaining weight, increases energy and regulates blood sugar.
